

PREPARING YOUR WORKS FOR THE GALLERY

FRAMED AND STRETCHED CANVAS

- In the gallery we hang works from two hangers, hooking directly into the d rings
- **SMALL WORKS** (up to approx. 40cm x 40cm): D rings 5cm down
- **LARGE WORKS** (larger than approx. 40 x 40cm): D rings 10cm down

TIPS

- D rings should be at least 10mm wide
- The measurement should be from the top of the artwork (including frame) to the top of the D ring
- Measure each side and ensure they are the same so that your artwork will sit level
- D rings and screws can be sourced online and usually from framers
- Choose the right size D ring for the scale and weight of the artwork
- Choose the right size screw for the depth of the frame
- If you are getting your artwork framed you might like to ask the framer to install the requirements for the gallery, as well as d rings and string for hanging in the home
- We may hang very small works from one position (hook or hanging wire)

UNFRAMED WORKS (printed photos, works on paper etc.)

- How will your artwork hang safely without damaging it?
- Does your work need a supporting structure: matted or mounted onto foamcore etc.? (Special hooks are available specifically for foam core)
- Does it need to have hooks/loops/tabs etc. sewn or attached?

OBJECTS

- The gallery has a variety of plinths, display cabinets etc. to display objects
- Please supply support stands or additional display items if required to safely support your object

If you are uncertain of how to prepare your artwork for display please contact the gallery to discuss possible solutions prior to the artwork delivery date.
