

RFQ # Q-2122-CS-65 – Three Tear Monitoring

ADDENDUM TO SCOPE OF WORKS

Our apologies, a further clarification is required.

The monitoring program is to be carried out generally in accordance with the EA EPPR00818213.

I have highlighted the three areas (below) when the monitoring program deviates from the requirements of the EA.

In the three highlighted sections additional monitoring or reporting is required.

ADDENDUM

1.4 Specification of Works to be carried out

1. Groundwater

Groundwater monitoring is to be conducted in accordance with the conditions of EA EPPR00818213 and Table WT4.9 - Groundwater Monitoring Parameters.

Note: All annual monitoring parameters are to be sampled and monitored quarterly.

2. Landfill Gas Monitoring

Landfill gas monitoring is to be conducted in accordance with conditions of EA EPPR00818213 and previous studies and reports.

An annual landfill gas summary report in pdf format is to accompany the Excel spreadsheet for the November round of monitoring to provide context, describe the site, methodology used and consolidate findings.

3. Landfill Leachate Monitoring

Leachate samples are to be collected annually from the two (2) leachate collection tanks (wells) LT1 & LT2.

4. Landfill Surface Water Monitoring

Surface water sample are to be collected annually from the two (2) main sedimentation dam(s) and tested based on conditions of EA EPPR00818213 and Table WT4.1-Surface water release limits.

Note: All annual monitoring parameters are to be sampled and monitored quarterly.
